DETAILED ACTION

The amendment filed on July 30, 2007 has been entered. Claims 23-24, 33 and 35 are canceled, claims 11-12, 14-22, 25-32, 34 and 36-54 are pending, and claims 42-42 and 45-46 remain withdrawn from further consideration.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 11-12, 14-16, 25, 27, 29, 31-32, 36, 38, 40, 42, 44, 48-49 and 51, drawn to a heat exchanger, classified in class 165, subclass 104.21.
- II. Claims 17-18, 20-22, 26, 28, 30, 34, 37, 39, 41, 47, 50 and 52-54, drawn to a method of manufacturing a heat exchanger, classified in class 29, subclass 890.03.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process such as disclosed in Steele et al and Uchida et al, as argued by applicant.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification and their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3744

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
